Japanese architecture refers to the traditional and modern architectural styles, elements and techniques of Japan. It is a fusion of indigenous and sometimes imported techniques. The following are common types of Japanese architecture.

The Japanese House: Architecture and Interiors: Black — Simplicable

If you are interested in a quick overview of Japanese architecture without thorough-going authenticity, this may be too much for your purposes. Try the abbreviated volume Museum and Construction of the Japanese House instead. But if you are interested in the details, in authentic reconstruction, or clear plans for everything from floor planning to framing to crafting to shop, doors, and layout, and more importantly, in how these specifics naturally stem from the culture and needs of the Japanese...

The Japanese House: Architecture and Interiors: Black — Simplicable

The grace and elegance of the Japanese sensibility is reflected in both modern and traditional Japanese homes, from their floor plans to their use of natural materials. In the Japanese house, renowned Japanese photographer Nobuyoshi Araki has captured this latter spirit with hundreds of vivid color photographs of 15 Japanese homes. As we step behind the lens with Araki, we are witness to the unique Japanese aesthetic, to the simple Profoundly modest after the experience of the industrial age...

The Japanese House: Architecture and Interiors: Black — Simplicable

In The Japanese House, visitors could experience a day in the Tokyo home of the enigmatic urban hermit, Yasuo Moriyama, designed by Ryue Nishizawa (SANAA), awaking in and out of the hour's ten individual, fully-furnished rooms and noise-like gardens, Rabbit chairs, sliding screens and an "outdoor" cinema were just some of the details that made up Moriyama's unusual domestic environment as day turned to night creating a full sensory experience...

Japanese architecture - Wikipedia

Japanese architecture (日本建築, Nihon kenchiku) has been typified by wooden structures, elevated slightly off the ground, with tiled or thatched roofs. Sliding doors (shoji) were used in place of walls, allowing the internal configuration of a space to be customized for different seasons.

Japanese architecture - Wikipedia

The sequence is very central to Japanese architectural experience and was emulated by Frank Lloyd Wright in his American home designs. Surrounding the home is a concrete parapet that encloses the ...
